Self-adaptive and Self-healing Nanocomposite Tribocoatings

Huatang Cao

university of
 groningen

faculty of science
and engineering

The research presented in this thesis was performed in the Advanced Production Engineering (APE) group of Engineering and Technology institute Groningen (ENTEg) and Materials Science Group of Zernike Institute for Advanced Materials at the University of Groningen, The Netherlands.

This research was carried out under financial support by Chinese Scholarship Council (CSC, No. 201406160102).

Print: Zalsman Groningen B.V.

Self-adaptive and Self-healing Nanocomposite Tribocoatings

PhD thesis

to obtain the degree of PhD at the
University of Groningen
on the authority of the
Rector Magnificus prof. E. Sterken
and in accordance with
the decision by the College of Deans.

This thesis will be defended in public on

Monday 25 March 2019 at 11.00 hours

by

Huatang Cao

born on 20 June 1987
in Hunan, China

Supervisors

Prof. Y.T. Pei

Prof. J.T.M. De Hosson

Assessment Committee

Prof. A. Cavaleiro

Prof. J. Post

Prof. A. Vakis

Contents

Chapter 1 Introduction.....	1
1.1 Tribology.....	1
1.2 Solid lubrication.....	3
1.3 Self-adaption and self-healing functionality.....	7
1.4 Outline of the thesis.....	10
Reference.....	12
Chapter 2 Synthesis, characterization and testing of WS₂/a-C(H) tribocoatings.....	17
2.1 Physical vapor sputtering.....	18
2. 2 Coating deposition.....	20
2.3 Characterization techniques.....	22
2.3.1 Microstructure characterization.....	22
2.3.2 Chemical composition.....	29
2.3.3 Mechanical testing.....	33
Reference.....	36
Chapter 3 Effect of carbon concentration and argon flow rate on the microstructrue and tribological properties of magnetron sputtered WS₂/a-C coatings	39
3.1 Introduction.....	40
3. 2. Experimental procedures	41
3.2.1 Preparation of the WS ₂ /a-C coatings.....	41
3.2.2 Characterization of the WS ₂ /a-C coatings.....	42
3. 3. Results and discussions	46
3.3.1 Basical charcterisitic of WS ₂	47
3.3.2 Chemical and structural characterization	48
3.3.3 Mechanical and tribological properties.....	51
3.4 Conclusion	58
Reference.....	59
Chapter 4 On the S/W stoichiometry and tribopformance of WS_xC(H) coatings deposited by magnetron sputtering.....	63
4.1 Introduction.....	64
4. 2. Experimental procedures	64

4. 3. Results and discussions	65
4.3.1 Chemical composition and structural characterization.....	66
4.3.2 Mechanical properties	74
4.3.3 Tribological properties.....	76
4.4 Conclusion	81
Reference.....	81
Chapter 5 Instant WS₂ platelets reorientation of self-adaptive WS₂/a-C tribocoating	87
5.1 Introduction.....	88
5. 2. Experimental procedures	88
5. 3. Results and discussions	89
5.3.1 Microstructure characterization	89
5.3.2 Tribological properties	90
5.3.3 Self-adaptive mechanism	91
5.4 Conclusion	94
Reference.....	94
Chapter 6 On the self-healing performance of WS₂/a-C tribocoatings	97
6.1 Introduction.....	98
6. 2 Experimental procedures	99
6. 3 Results.....	100
6.3.1 Microstructural characterization	100
6.3.2 Self-healing of damages	101
6.4 Discussions.....	112
6.5 Conclusion	120
Reference.....	120
Chapter 7 Summary and outlook.....	125
7.1 Summary	125
7.1 Outlook.....	127
Samenvatting	133
Appendix	137
Publications	149
Acknowledgement	152
